

Corporate Profile

WHO WE ARE

Factory-direct into East Africa.

Clear Vision Ventures FZCO is a founder-led trading house based in Dubai. We aggregate distributor demand across East Africa, buy direct from vetted Chinese manufacturers, inspect goods before they ship, and deliver to port with a complete document set. Buyers keep control of their own clearance and duty; we remove the intermediary layers between the order book and the factory floor.

We trade two categories, deliberately narrow. We would rather know two properly than quote on anything.

WHAT WE TRADE

Two categories, sold to the same distributor.

ANCHOR LANE

Automotive Consumables

Fast-moving service items for parts distributors and fleet workshops — the lines that reorder every month.

- Filtration, braking & friction, ignition
- Bearings, belts and suspension
- Lighting and electrical components
- Welding, abrasives and workshop PPE

SECOND LANE · BRIDGE TO BUILDING MATERIALS

Solar & Electrical

The distributor buying switchgear and fittings is usually the same one buying site consumables and finishes.

- Inverters, charge controllers, solar water pumps
- Switchgear, circuit breakers, distribution boards
- Fittings, controls and lighting
- Electrical accessories

What we do not import: raw cable and lead-acid batteries. Kenyan local production is genuinely competitive on landed cost in both, and we would rather say so than quote a lane we cannot win. They remain useful conversations — a buyer producing cable locally still imports switchgear, controls and accessories.

CORRIDORS

Where we operate

Operating China · UAE · Kenya · East Africa

Expansion Nigeria · Ghana · Tanzania

METHOD

How we work

The same discipline runs through every shipment: verify the source, inspect the goods, document everything, and structure terms that let volume compound.

01 Aggregate We pool demand across many buyers into containerised programs with real negotiating weight.	02 Verify We vet the factory before an order is placed. No shipment moves without independent pre-shipment inspection.	03 Document Conformity certificates and complete export documentation, prepared before funds or goods move.	04 Structure First orders run on deposit and balance. Credit terms follow as the account builds and cover is arranged.

COMMERCIAL

Terms and quality

Quality. Factory vetting before order, pre-shipment inspection before loading, and PVoC conformity documentation handled end-to-end.

Aggregation. Consolidated container programmes for sub-container buyers — better prices, one invoice, one arrival.

Terms. Deposit and balance on first orders; structured credit for qualified repeat buyers as the account builds and trade credit insurance cover is arranged.

Packaging. Neutral packaging available — your brand on the carton, not the factory's.

Documents. Invoice, packing list, certificate of origin and bill of lading prepared to clear cleanly at destination.
